

# WEBINARS ON DEMAND

## THE PROFESSIONAL DEVELOPMENT TRAINING SERVICE FOR BUILT ENVIRONMENT PROFESSIONALS

### ATTEND OUR PROFESSIONAL DEVELOPMENT WEBINARS ESPECIALLY DESIGNED WITH SUBJECT MATTER FOR ALL BUILT ENVIRONMENT PROFESSIONALS

#### Meet your training needs whilst remaining at your Office / Home

Webinars On Demand is a Service run by Contracts On Demand and is made available as part of the e-CLOUD Construction® Suite of Productivity Services. It is delivered using the Cisco WebEx® Event Centre, so there's no software or hardware to install.

Contracts On Demand® has, for many years, organised Training Workshops for the industry; gaining wide recognition for covering a wide range of subjects affecting the competency of the industry and attracting many high calibre speakers. We have had many requests to hold these events outside the main cities, but financial restraints have until now restricted this.

Webcast technology has now reached a level that makes it a viable alternative and possible to reach a significantly wider audience.

#### Our Webinar Service provides you with the following:

##### Features:

- A secure system
- On-line registration
- E-mail reminders and follow-up
- Multimedia presentations using Streaming Video, Power-point, Whiteboards, etc.
- Share the Hosting Manager's Desktop
- "Chat" text that all or a select few can see
- User polls and threaded Q & A's
- Make Notes during the Webinar, then save them afterwards as a text file
- Speakers shown side-by-side with their presentation
- Access Webinars on your iPad

##### Benefits:

- Accessibility to professional development training from Office or Home
- Lower cost training
- CPD accreditation
