

PROJECT PROFILE SERVICE

This Service is the key integrating your Project Services within the e-CLOUD Construction® Suite of Productivity Services. It is available through www.e-cloud.co.za and www.projectprofile.co.za

WHAT IS THE PROJECT PROFILE SERVICE?

PROJECT PROFILE is an Internet based Service that enables members of a Construction Project Team to create and update a Project Website Portal for their Construction Project. No programming experience is necessary as you only need to enter text and photographs in the form of image files. This can be done at any time and your Project Profile is accessible from anywhere in the world, 24/7.

Participating members of the Project Team are given an ID and Password that enables them to collaborate by viewing and contributing to the Project Profile and the Project's current progress status. The Service links to other e-CLOUD Construction Services that the Project Subscribes to. Project Profiles of other Projects that your company runs, can be linked to, from within each Project Profile.

FEATURES: CREATION & UPDATING FACILITIES

The following facilities are provided for the creation and updating of a Project Profile at any time:

- instruction and tips facility, accessible at any time from the 'HELP' button
- a navigation bar to select the editing of any section
