e-CCN CORPORATE CONNECTION SERVICE March 2023

The e-CLOUD Construction Network is a collection of online cloud-based Services that are designed to provide users, working in the construction industry, with a consolidated, integrated resource for increasing their productivity and decreasing their costs.

Free online Tutorials are provided on the use of the e-CCN Services.

A User Customer Support Service is available during office hours, providing assistance for Network Registered Users.

Network Registered Users

e-CCN currently has some 16 000 Registered Users and 10 000 Registered Companies using the Services provided on the Network.

e-CCN Corporate Connection Service

This Service is designed for companies who wish to take advantage of the numbers of Users accessing the e-CLOUD Construction Network for promoting their Services. It enables Users to identify your company's Services and to connect to each description of your Service(s) on your website.

Users

When Users login to e-CCN they are able to access the 'Corporate Connection Service' and search for companies under company Categories e.g. Quantity Surveyors, Banking, Insurance, Software Services etc. Each Category leads the User to a list of companies under that Category. From that list users can choose a particular company and reach that Company's Channel page that lists the company's Services. Choosing a particular Company Service, takes the User to that company's Website Page describing that Service.

Channel Content Providers

Companies wishing to participate in the Service by taking a Company Channel, are Provided with the following:

- i. Your Company's own Channel page where you can list connections to your Services.
- ii. A e-CCN Corporate Interactive Banner (Example shown below) that will appear on a page of the e-CCN Network.
- iii. A connection to one of your Services

Companies requiring more than one Service connection can purchase each of them at an additional cost. The e-CCN Corporate Connection Service is charged for on an annual basis.
